DETAILED ACTION

Response to Arguments

Applicant's arguments filed on April 12th, 2004 have been fully considered but they are not persuasive. The applicant contends that Japuntich does not have an inherent curvature or contour shape to flatten.

The examiner disagrees. Japuntich discloses a valve flap that has a contour shape and further wherein at least a portion of the contour shape of the valve flap 24 is at least partially flattened when the valve flap 24 contacts the valve seat 40. Refer to figures 3-7 and columns 6, 7, and 8.

In conclusion as stated in the previous office action claims 6 and 7 are objected. However, claims 1 through 4 and 8 through 18 are rejected under 35 U.S.C. 102(b) as stated in the previous office action and claim 5 is rejected under 35 U.S.C. 103(a) as stated in the previous office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3743

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
